

SO helps NHS procurement send less to landfill

The Client

South of England Procurement Services provides a Procurement and Supply Chain Management service to NHS trusts, clinical commissioning groups and commissioning support units across the south of England.

The Service

“We wanted to start recycling and chose the SO Recycle system as it promised it could recycle more material than the other systems that we looked at” says the spokesperson for South of England Procurement Services. “We also liked the fact that SO was a family-ran local business, with over 30 years of experience”.

“We felt that it was our responsibility as a company to send far less waste to landfill, which SO assured would be the case if we used their recycling system. Their service also came out on top for costs, plus the fact that we would have an Account Manager was really appealing — this was something we noticed wasn’t generally offered by their competitors”.

The Results

“SO advised us on the best recycling solution for our company, and suggested that we use their recycling bins. Before the service started we were sceptical as to whether it was going to work for us, but we’ve been converted! It has turned out to be a really great recycling system. We now only have to empty our bins once a week, and it’s incredible just how little general waste we now produce, and all because of the SO Recycle system. Which has reduced our waste costs, and is also, more importantly, so much better for the environment!”

“We have found their service to be flexible, friendly, and delivers what we actually need, plus their all-inclusive pricing is a definite plus. I wouldn’t hesitate for a second in recommending the SO Recycle system to any business that wants to do their bit for the environment!”

“It’s incredible how little general waste we now produce, and it’s all because of SO Recycle”.
